

TONI MARTÍNEZ • JARDINERÍA

Complete outdoor maintenance for residential communities

Torre Vieja • Orihuela Costa • Vega Baja, Alicante

20 years

of experience in gardening and outdoor care

Communities

specialized in residential communities

All-in-one

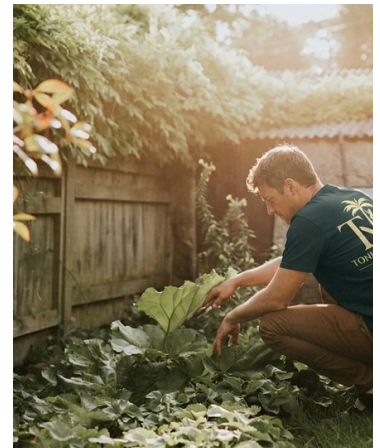

garden, pool, cleaning, masonry & waste

About Us

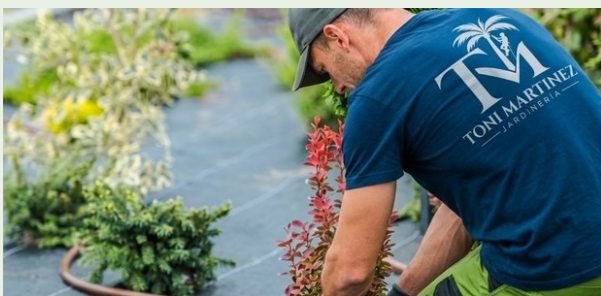

Nearly 20 years of experience in gardening and outdoor maintenance, working closely with communities in Orihuela Costa and Torre Vieja, the last 9 running my own independent business.

We don't stop at the garden: we cover every type of work a community needs — gardening, palm tree pruning, pool care, common area cleaning, masonry and waste management — through a single trusted provider.

All through a single point of contact and a single invoice.

Our Services

Gardening & green areas

Lawn mowing and edging, hedge trimming, irrigation control and programming, and outdoor cleanup with professional blowers and tools.

Palm tree pruning

Technical pruning at height, removal of dead fronds and preventive treatment, with the equipment and experience that community properties require.

Pool maintenance

Daily monitoring in high season and preventive maintenance the rest of the year: water chemistry, floor and wall cleaning, and equipment checks.

Common area cleaning

Regular cleaning of stairwells, entrances and shared areas, with frequency tailored to each community's needs.

Masonry & small repairs

Minor repairs and small jobs in common areas, with no need to coordinate separate outside contractors.

Waste management

Collection, bagging and transport to an authorized recycling facility of all waste generated during maintenance.

Why work with us

- One single point of contact for every service: fewer calls, fewer suppliers to manage.
- Nearly two decades of hands-on, real-world experience — not just managing a crew.
- Maintenance plans and frequencies tailored to each community, not a fixed package.
- Regular presence across Torrevieja, Orihuela Costa and the wider Vega Baja area.
- A clear commitment in writing before any work begins — no surprises.

LET'S SCHEDULE A VISIT

Every community is different. We visit the property at no obligation, assess its current condition, and propose a tailored maintenance plan.
